The image contains three panels labeled 'Data', 'Fit', and 'Pulls', each showing a scatter plot with a color scale indicating the number of vertices per bin. The 'Data' panel on the left shows a distribution of points with a color gradient indicating the density of vertices. The 'Fit' panel in the middle has a similar distribution but with a different color scale. The 'Pulls' panel on the right shows residuals/errors with a color gradient indicating the magnitude of the pull. The graph is labeled 'LHCb' in the bottom right corner.
